A Fábrica Cerâmica de Valadares, S.A. (FCV), foi fundada em 25 de Abril de 1921, está localizada desde a sua fundação na vila de Valadares, no concelho de Vila Nova de Gaia, ocupando actualmente uma área total de 176.000 m², sendo 72.000 m² de construção e dando emprego a cerca de 500 pessoas.

Ao longo da sua existência a Valadares dedicou-se sempre à produção de artigos cerâmicos, tendo-se iniciado com o fabrico de tijolo, telha e material refractário, passando mais tarde a fabricar peças de grés cerâmico e louça decorativa, azulejo, mosaico, louça sanitária e acessórios cerâmicos para quarto de banho.

Nos dias de hoje, a Valadares dedica-se à Concepção, Produção e Comercialização de artigos Sanitários, oferecendo uma vasta gama de produtos, quer para a sala de banho, quer para aplicações técnicas onde o material cerâmico é requerido. Completamos essa oferta com mercadorias que comercializamos como torneiras, banheiras, colunas de hidromassagem, resguardos de chuveiro, etc.

O saber fazer da Valadares, sedimentado por mais de 80 anos de actividade na Cerâmica, permite-lhe hoje garantir um nível de Inovação e Qualidade que a colocam entre os melhores produtores Europeus de artigos Sanitários, numa clara demonstração do que uma Empresa Portuguesa é capaz de realizar, numa das actividades industriais mais competitivas e exigentes.

O nosso investimento recente nas áreas de design e criação de novos produtos, reforçou a sua capacidade em inovar e surpreender o mercado, com artigos de elevado índice técnico e de estilo simples mas personalizado. A capacidade de inovar no design, é ampliada pela capacidade técnica em desenvolver novos materiais como o Gresanit ®, que melhor interpretam as exigências de durabilidade e resistência que o mercado nos impõe.

A Valadares exporta cerca de 70% dos artigos que produz um pouco para todo o mundo, com especial incidência na Europa e na Ásia. Desde 1990 a Valadares opera em Espanha através da Valadares Espanha com a sua própria rede de vendas e distribuição.

Numa época em que o Ambiente e a Energia constituem grandes preocupações às sociedades desenvolvidas, orgulha-nos o facto de estarmos certificados desde Julho de 1999, de acordo com a Norma NP EN ISO 9000:2000 pela APCER e termos sido a primeira empresa de sanitário da Europa certificada pela NP EN ISO 14001:1999 (Sistemas de Gestão Ambiental) em Abril de 2001.

Assim, convidamo-vos a iniciar a viagem ao nosso catálogo de 2008, esperando que o equilíbrio que procuramos entre inovação, design e qualidade possam oferecer a melhor proposta para a vossa sala de banho.

Fábrica Cerâmica Valadares, S.A. (FCV) was founded on April 25th 1921. Since its foundation it has been located in town of Valadares in the district of Vila Nova de Gaia, currently occupying a total area of 176,000 m², whereof 72,000 m² is constructed area, and providing employment to around 500 people.

During the course of its existence Valadares has always been involved in the production of ceramic items, having started off by manufacturing ceramic sandstone pieces and decorative crockery, tiles, mosaics, sanitaryware and ceramic accessories for the bathroom.

Today, Valadares is involved in the Design, Production and Commercialisation of Sanitary items, providing a wide range of products both for the bathroom and for technical applications where ceramic material is required. We complement this product range with other goods we commercialise such as taps, baths, hydromassage columns, shower screens etc.

The know-how of Valadares, backed up by 80 years in the Ceramics business, enables it today to ensure a level of Innovation and Quality which rank it alongside the best European producers of Sanitary items, clearly demonstrating what a Portuguese company is capable of achieving in what is one of the most competitive and demanding industries.

Our recent investment in the design and creation of new products has strengthened our capacity to innovate and surprise the market, with items of high technical complexity and a simple but personalised style. The capacity to innovate in design combines with our technical capacity to develop new materials such as Gresanit which better meet the demands for durability and resistance placed upon us by the market.

Valadares exports around 70% of the items it produces around the world, particularly Europe and Asia. Since 1990 Valadares has operated in Spain through Valadares Espanha with its own sales and distribution network.

At a time when the Environment and Energy are major concerns for developed societies, we are proud to have been certified since July 1999 in accordance with Standard NP EN ISO 9000:2000 by APCER and have become the first European sanitary company to be certified by NP EN ISO 14001:1999 (Environmental Management Systems) in April 2001.

We would thus like to invite you to take a browse around our catalogue for 2008 in the hope that the balance we seek between innovation, design and quality can lend a special something to your bathroom.

Fábrica Cerâmica de Valadares, S.A. (FCV) a été fondée le 25 avril 1921 et se situe depuis sa création à Valadares, dans la commune de Vila Nova de Gaia. Elle occupe actuellement une superficie totale de 176 000 m², dont 72 000m² de bâtiment, et emploie près de 500 personnes.

Tout au long de son existence Valadares s'est toujours consacrée à la production d'articles en céramique, passant, à ses débuts, de la fabrication de briques, de tuiles, et de matériel réfractaire à la fabrication de grès, de céramique, de faïence décorative, d'azulejos, de mosaïque, de sanitaire et d'accessoires en céramique pour salle de bain.

Aujourd'hui, Valadares se consacre à la Conception, à la Production et à la Commercialisation d'articles Sanitaires en offrant une vaste gamme de produits aussi bien pour la salle de bain que pour des applications techniques où le matériel céramique est requis. Nous complétons cette offre par des produits que nous commercialisons comme, par exemple, les robinets, les baignoires, les colonnes d'hydromassage, les receveurs de douche, etc.

Le savoir-faire de Valadares, consolidé par plus de 80 ans d'activité dans la céramique, lui permet de garantir aujourd'hui un niveau d'Innovation et de Qualité et de la placer parmi les meilleurs producteurs Européens d'articles Sanitaires, démontrant ce qu'une Entreprise Portugaise est capable de réaliser dans l'une des activités industrielles les plus exigeantes compétitives.

Notre récent investissement dans le domaine du design et de la création de nouveaux produits renforce sa capacité à innover et à surprendre le marché, avec des articles à l'indice technique élevé et au style simple mais personnalisé. A la capacité d'innover dans le design s'ajoute la capacité technique à développer de nouveaux matériaux comme le Gresanit® qui expriment mieux les exigences de durabilité et de résistance imposées par le marché.

Valadares exporte près de 70 % des articles qu'elle produit à travers le monde, principalement en Europe et en Asie. Depuis 1990, Valadares opère en Espagne avec Valadares Espagne qui possède son propre réseau de ventes et de distribution.

A une époque où l'Environnement et l'Energie font parties des grandes préoccupations des sociétés développées, nous sommes fiers d'être certifiés depuis juillet 1999 en accord avec la Norme NP EN ISO 9000:2000 par l'APCER et d'avoir été la première entreprise de sanitaire en Europe certifiée par la NP EN ISO 14001:1999 (Système de Gestion Environnementale) en avril 2001.

Nous vous invitons ainsi à commencer un voyage à travers notre catalogue 2008, en espérant que l'équilibre que nous cherchons entre innovation, design et qualité puisse offrir la meilleure réponse pour votre salle de bain.
